**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### Claim Rejections - 35 USC § 102(e)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 8-10 & 12-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Tanaka et al., "hereinafter referred to as Tanaka '816", (US Pat. 6,887,816 B2).

Tanaka '816 discloses a product material, which comprises a coating agent comprising photocatalytic particles and a binder (inorganic compound, i.e., Zr, Si, Ti, and Al) on an inorganic substrate (metal or ceramic). The photocatalytic particles are composite particles containing titanium oxide and photocatalytically inactive ceramic (alkaline earth metal, transition metal, or Al). The titanium oxide contains a rutile-type crystal form. Further, the titanium oxide contains at least two crystal forms selected from the group among anatase, rutile, and brookite. See col. 24- col. 26, claims 1-62 of the reference.

There is no patentable distinction seen between the claimed catalyst carrier and catalyst body, and those disclosed by Tanaka '816. Thus, the claims are anticipated by the teaching of the reference.

**Claim Rejections - 35 USC § 103**

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tanaka et al., "hereinafter referred to as Tanaka '816", (US Pat. 6,887,816 B2).

Tanaka '816 discloses photocatalytic particles and product material as described above, except for the pre-coat layer amounts being required.

However, it would have been *prima facie obvious* to one of ordinary skill in the art at the time the invention was made to have predetermined optimum amounts of such materials of the photocatalytic particles of Tanaka '816 in order to achieve an effective catalyst material because it is a result effective variable, in view of *In re Boesch*.

**Citations**

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. All references are cited for related art. See PTO-892 Form prepared.

**Conclusion**

6. Claims 8-14 are pending. Claims 8-14 are rejected. No claims are allowed.
